

Darkling

The new remix album from Synoiz

Following the success of his debut album “Ambients” and its string of promotional singles comes Darkling the new remix LP from north east England electronic instrumental artist Synoiz.

13 different artists spanning a range of genres and styles from around the world have contributed their exclusive remixes of Synoiz tracks to be included on this new compilation. From upbeat reworkings of “Darkling” and “Cooper” to a lavish film score organic reinterpretation of album track “Of Rolling Hills” from Madeleine Bloom, whom critics are calling Germany’s answer to Imogen Heap, Darkling flows from dance to pop to trip hop and at points flirting with dubstep, industrial and glitch.

Darkling will be released for digital download on November 5th 2012.

Whether you’re an existing fan of the dark world of Synoiz or a new listener looking for something different, Darkling has something for everyone from the wellspring of Synoiz’s ever expanding discography.
